

BioVert Plus

Supplément pour aquarium d'eau douce peu à moyennement planté

PACKAGING

- **100 ml** for an aquarium from 4 000L (1 056 Gal)

- **250 ml** for an aquarium from 10 000 L (2 500 Gal)

- **500 ml** for an aquarium from 20 000 L (5 000 Gal)

BIOVERT PLUS is a growth supplement optimized for aquatic plants. It is intended for small to medium-planted aquariums that host a medium to large population of fish.

BIOVERT PLUS contains phyto-hormones selected for their ability to develop plant growth, enhance their vitality and improve leaf development. It provides potassium, calcium, magnesium, trace elements, and bioavailable iron for plants.

It contains neither nitrate nor phosphate.

Directions of use : as a general rule, once a week and/or after a water change. This dosage can be changed to once every 3 days if required. Pour directly in the aquarium at the filter exit.

- Do not leave within the reach of children
