

BioClean Fresh

brings together BioDigest (live purifying bacteria) and BioTrace (micronutrients) to effectively biologically clean your freshwater aquarium.

PACKAGING

- **Nano Range,**
Aquarium from 0 to 120 l
(0 to 30 US gal)
Blister of 4 vials
- **Standard Range,**
Aquarium from 120 to 1 000 l
(30 to 250 US gal)
Boxes of 6, 30 vials

BIOCLEAN FRESH is a natural aquarium cleaner that combines BIODIGEST and BIOTRACE.

BIODIGEST is made up of natural nitrifying, nitrate reducing and facultative bacterial strains selected for their ability to convert ammonia into nitrites, nitrites into nitrates and nitrates into nitrogen.

These bacteria (50 billion in each 1ml ampoule) work together with each strain finishing off the work started by the others. Some are capable of biosynthesizing nitrate reducing enzymes in aerobic conditions. This enables water to be effectively purified, nitrates and phosphates to be reduced and prevents the spread of filamentous algae.

By competing for food and through a probiotic effect they also prevent the proliferation of pathogenic organisms and reduce the risk of unexplained diseases.

BIOTRACE contains all the microelements needed for aquarium life (selected amino acids, enzymes, natural vitamins and a natural plant surface active agent enabling better membrane absorption by cells).

It also provides trace elements: sulphur for proteins, iron for plants and fish blood, cobalt for B vitamins and boron for many products metabolised during cell building, calcium, magnesium, manganese, zinc, molybdenum and potassium.

BIOTRACE also facilitates the elimination of nitrates and phosphates, which are an early warning sign of algae problems, and carbohydrates, and therefore helps to regulate decomposition odours and optimise water quality.

DOSAGE FOR EACH PRODUCT

- **Nano Range :**
1 vial for 60 l (15 US gal) /15 days
- **Standard Range :**
1 vial for 200 l (50 US gal) /15 days
